## Periscoping the World

CPYRGHT

BERN, SWITZERLAND — The real reason why Swiss Attorney General René Dubois killed himself last month was a U.S. Central Intelligence Agency investigation which found that American Embassy phones were being tapped. The probe was ordered after French Premier Mollet complained to Secretary Dulles about U.S. contacts with Algerian rebel leaders here. The French commercial attaché here, who was a close friend of Dubois, was recalled to Paris after unofficial U.S. complaints.
